# SITUATION SUMMARY

## Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

### **Oroville Dam Auxiliary Spillway Incident**

- The Department of Water Resources (DWR) will continue to monitor the status of the dam, spillways, and related structures to ensure their continued safety and stability.
- On 04/14/17 at 0900 hours, per DWR, spillway releases were increased to 35,000 cfs from 1300 cfs and 0 cfs to the power plant.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 04/26/17 at 0600 hours](#):

- Inflow: [20,897](#) cfs.
- Outflow: [37,027](#) cfs.
- The current lake elevation is [849.68](#) feet.

### **Mission Tasking**

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

## SITUATION SUMMARY

### Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC

# **SITUATION SUMMARY**

## **2017 February Storms**

### **Cal OES Coastal Region**

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- Nacimiento-Ferguson Road is now opened to the public.
- A southern detour route is open to local traffic only.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

#### **River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Solano County: Sacramento River at Rio Vista

### **Cal OES Inland Region**

#### **River Forecast - The following rivers are forecast to meet or exceed Flood stage:**

##### **Placer County:**

- Truckee River at Truckee is forecast to be above flood stage at 4.5 feet starting the morning of 04/24/17 through 04/28/17.
  - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

#### **River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Colusa County: Sacramento River at Colusa Weir
- Sutter County: Sacramento River at Tisdale Weir, Sacramento River at Fremont Weir
- Yolo County: Yolo Bypass at Lisbon
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevenson, San Joaquin River at Newman

# WEATHER OF CONCERN

## Weather of Concern

- A weak weather system may bring light showers and high elevation snow today over portions of Northern California.
- High pressure will produce gusty northerly winds through Friday for portions of Southwest California.

## **Active Weather Warnings, Watches and Advisories by County:**

- [http://www.wrh.noaa.gov/sto/brief/www\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php) - Temporarily unavailable.

# **WEATHER SYNOPSIS BY REGION**

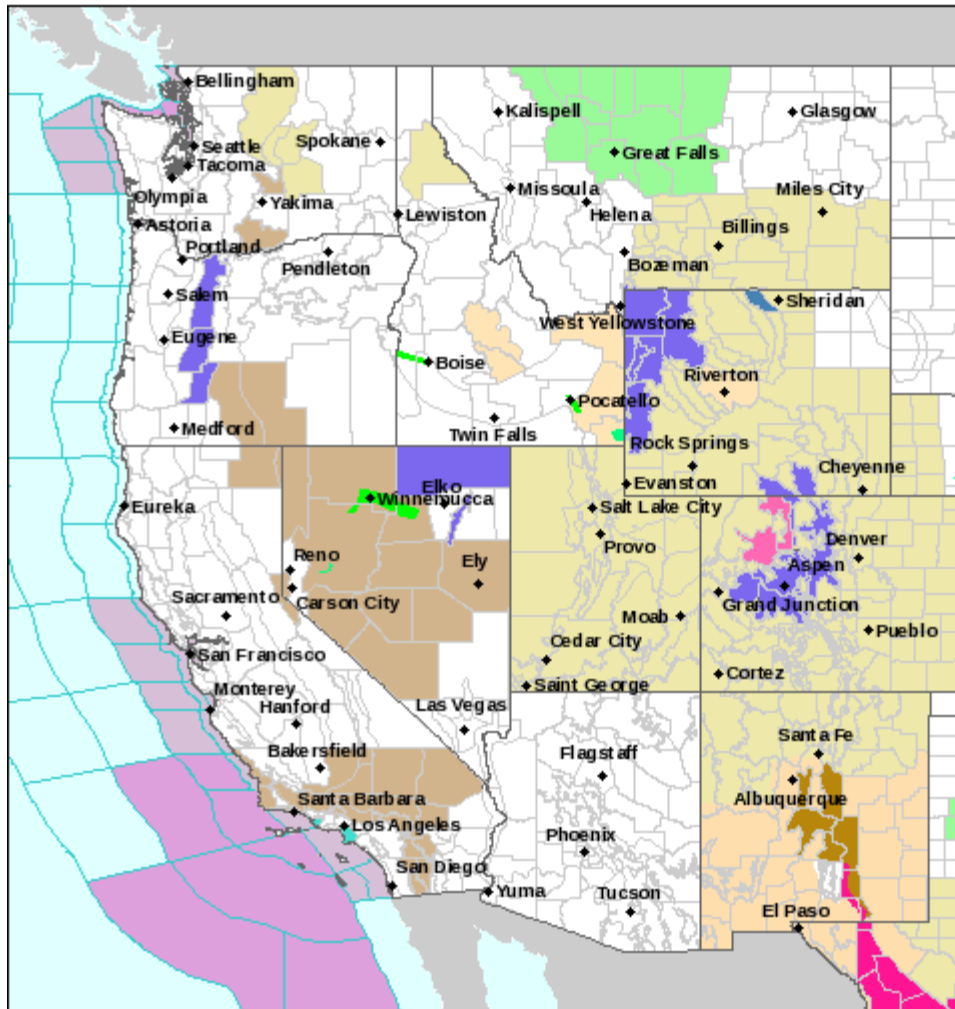

## **NORTHERN CALIFORNIA**

Showers will linger over the region into early Thursday as a couple of small weather systems move through the area. Overall the showers will be light, but the heaviest precipitation will be in the northern half of the region, and the northwest areas may see a period of rather steady precipitation today. The final showers will end in the eastern mountains on Thursday, and Friday through the weekend will be sunny and much warmer as high pressure begins to build overhead. Gusty south to west winds are expected today, with peak gusts reaching 20-30 mph in many areas, and 40-50 mph in wind-prone mountain locations. Beginning Thursday night, moderately strong, gusty northerly winds will develop and continue into Saturday. Temperatures will be on an increasing trend this week from 10-15 degrees below normal over the next few days to about 5 degrees above normal Sunday. The warmest inland valley areas will be in the mid 70s to low 80s Sunday. At this time next week looks warm with occasional mountain showers or thunderstorms.

## **SOUTHERN CALIFORNIA**

Gusty winds in the Kern County Mountains, Central Coast and High Desert this week. A progressive northwesterly flow will remain in place throughout the week leading to periods of gusty winds and a slow warming trend. The strongest winds this morning are occurring in the Kern County Mountains and the I-5 Corridor eastward into the Antelope Valley. Expect north-northwest winds in the 25-35 mph range with gusts to 50 mph in these areas today through this evening. It will also be breezy in and near the Banning Pass into the Coachella Valley and along the Central Coast where northwest winds of 20-30 mph with higher gusts can be expected during the afternoon hours through Friday. Temperatures will climb a bit each day, and by Saturday, expect high temperatures to be in the lower 90s in the inland valleys. Some stratus may cover the foothills and eastern sections of the San Joaquin Valley today and Wednesday and a few showers may develop in Yosemite National Park Wednesday afternoon and evening. Marine layer related drizzle may be possible near Point Conception today through Friday. Otherwise, no precipitation is expected through the period. This weekend, a low pressure area will sink into the Southern Rockies which may generate gusty north winds in the I-5 Corridor, Cajon Pass and the Colorado River Valley. Temperatures will turn slightly cooler Sunday and Monday.
